UM FORESTRY SCHOOL, STATE FORESTERS OFFICE  
TO SPONSOR SUMMER WORKSHOP FOR HIGH SCHOOLERS

Twenty Montana high school boys have an opportunity to study conservation methods for seven days this summer in an orientation camp sponsored by the University of Montana School of Forestry and the Office of the State Forester.

According to Robert W. Lange, assistant professor of forestry at UM and camp co-director, the workshop has two aims: to acquaint the participants with career opportunities in natural resource fields and to impress upon students the importance of a sound high school education as preparation for college. Don Drummond, Missoula, assistant state forester, is the other co-director.

Lange said conservation aspects of wildlife, range management, recreation, soil and water conservation, and timber will be covered in sessions conducted by UM Forestry School faculty and state forestry staff members.

The program will include classroom study, field trips, special work projects and guest speakers, all related to the many areas of resource management, according to Lange.

All operational expenses for the camp, which will be at Goat Creek Station on the Swan River State Forest, will be borne by the sponsoring agencies. There will, however, be a required registration fee of 50 cents to provide insurance. The boys selected also must furnish their own transportation to Missoula on June 11, the first day of camp, and their trip home June 17.

Students, who must have completed their junior year, will be chosen on a competitive basis. Recommendations will be required from teachers, school administrators or counselors and a school performance record with a statement of the student's interest must be included on each application.

Application materials may be obtained by writing Lange at the School of Forestry, the University of Montana, Missoula, 59801. They must be returned to him by April 24.
